Special Meeting Women's Institute

A special meeting of the
Champion Women's Institute
will be held at the home of
Mrs. McLean on Tuesday, May
30th, at 2:30 p.m. Mrs. J. D.
Hagerman, the Constituency
Convenor, will be the guest
speaker on this occasion, her
subject being "Canadian Litera-
ture." This will be Mrs.
Hagerman's first official visit to
our Institute, and it is hoped
that a goodly representation of
members and friends will greet
her. Musical items, including
a solo by Miss Mavis Moffat,
will lend variety to the pro-
gramme.

A hit and run driver ran into
cars driven by J. Harper and
T. Ashmore, on the highway
north of town, on Monday
evening. The latter's car was
badly smashed up. Corporal
Forsland was called and an
investigation followed. The
driver of the car, mislabeled from
Lethbridge, was located and a
trial will be held in Champion
on Tuesday May 30th. Accord-
ing to witnesses the car was
being driven without lights.

The field meet scheduled for
the 24th of May at Champion
has been postponed to June
3rd, because of the wet weather.

Elks Attention!

The next regular meeting of the
Benevolent and Protective Order of
Elks will be held in the Community
Hall, Champion, on Tuesday June 6th,
8:30 o'clock.

Your attendance will be appreciated.

H. E. GILL, Secretary

Attention O. O. R. P.

The next regular meeting of the
O. O. R. P. will be held in the Commu-
nity Hall on Tuesday evening, June
6th.

A good attendance would be ap-
preciated.

MAUD FREEZE, Secretary

HERBERT J. MABER

In Champion Thursday
Fridays and Saturdays.

W. H. Bowman Dies Suddenly

A prominent farmer and long
time resident of this district
passed away on Monday after-
noon May 22nd, in the person
of William H. Bowman. The
death came as a shock to the
community although he had
been ill for some time, but no
immediately fatal consequences
were looked for.

Deceased was born in Edinburgh,
Indiana on July 19th, 1863 and was
consequently in his 70th year. In 1912, with his
family he moved to Carmangay,
purchasing land about four
miles north of town, where he
was residing at the time of his
death.

During his residence here he
had improved his original land
holdings extensively, erecting
good buildings, planting trees
and making his home an attrac-
tive landmark. He had
always taken an active part in
everything pertaining to the
welfare of the town and district
and will be sadly missed in
every way. He was prominent in
Masonic circles being in the
shrine since 1896. Mr. Bowman
was a man of sterling character
optimistic in every respect and
loved by all. His demise at
this time will be the cause of
widspread and lasting regret.

He is survived by his widow,
two brothers, J. Bowman in Edinburgh,
Indiana; one son J. Bowman of
Carmangay and two daughters
Mary of Carmangay and Alva
of Edinburgh.

Funeral services were held in
the United Church Carmangay on
Tuesday afternoon at 2:00

o'clock and the remains were
shipped to the old Indiana
home for interment, accom-
panied by J. Bowman. There
was a large turnout of old time
friends and beautiful tributes
of flowers testified to the esteem
in which the deceased was held
by many friends. Rev. Findley
conducted the service.

Mothers--Daughters Celebrate

A delightful and most interest-
ing evening was spent in the
Community Hall on Friday
May 19, when a "Mother and
Daughter Banquet" was held
under the auspices of the U. G.
I. T., with about sixty present.
The theme for the evening was
"Sailing" and place cards were
tiny tugs with the C.G.I.T.
emblem on the flag. Before
the banquet Marjorie McCul-
lough, president of the senior
girls, and toastmistress of the
evening, welcomed the guests.

The following program was
given:

1. Toast, "The King" — "Ship
of State and its Captain," Marjorie McCul-
lough.

2. "God Save The King" — All.

3. Toast to the Mothers—Ships
That Stand By," Alice Miller.

4. Reply—Mrs. G. L. Depue.

5. "The Queen" — "The Flag
of the Fleet," Betty Caldwell.

6. Reply—Rev. Dawson.

7. Toast to The Home—"The Harbor
of Home," Laearia Clever.

8. "Home Sweet Home" — All.

9. Piano Duet—Kate Pharis and
Dorothy Datto.

10. Activities of the Clubs—Ruth
Jopling.

11. Talk to The Girls—Mrs. Williamson.

12. Song, "Mother" — Dora Miller.

13. Card Lighting Ceremony—
Miss Cook.

14. "The Fatal Quest"—C.G.I.T.
Girls.

15. Presentation to Leaders.

16. Sing Songs and Taps.

17. Right Now—Cabbage Plants,
Cauliflower, Tomato—at Camp-
bells.

Constance Bennett

IN

"Two Against the World"

Betrayed by her own Sweetheart !

Accused as a murderer. Trapped into a confession. Played
alive on the witness stand by the one man she trusted.

This picture has been called Constance Bennett's best. It is
a drama, with snappy lines, in which Miss Bennett plays a spoilt
city girl who, when the real test comes, shows she has the
intestinal fortitude to fight it out and take it on the chin while
doing it.

Where Dogs Are Important

Only Domestic Animal Of Unknown Race In Siberia

An unknown race of white people, including some who still live isolated from the rest of the world, live in the farthest north of the frozen land of Siberia, on the shore of the Arctic Ocean.

They are possibly descendants of those early Arctic navigators of the sixteenth century, who were lost while questing for the northern route to India.

To the north they are hemmed in by the Polar Sea. Behind them on all sides is a barren, snow-bound, trackless domain, as vast as a continent.

The people can neither read nor write. They have no bread and no means of baking it. They have never seen meat, butter, or beef, for cows and cattle are unknown. They have never seen deer, horses, or fowl—not even a cat.

Fruits and vegetables are utterly unknown, and only those who have traveled have heard of the white fox fur that have ever seen a horse.

Their one domestic animal is the dog. Nowhere else on earth is the dog more important or held in higher regard. For without the sled-dog, life would be utterly impossible to these people.

In the white wilderness of the tundra of the coast even reindeer cannot live. But the dog can be fed on the fish caught in the Indigirka River, along the course of which the settlers are watching unemployed demonstrations.

Dogs and their masters live mainly on frozen fish. Even in summer it has but to be buried a foot deep in earth to freeze.

Every family has a team of three or four dogs and the tether-coupe has teams of ten to eighteen. They draw the sleds which carry deadwood for fuel and ice from the river and without them hunting and trapping would be impossible.

A team usually consists of eight or twelve dogs, in pairs, with a single leader, harnessed to a light sled put together with straps and without a single nail. The leader of the team must understand all orders, and know how to turn, stop, and go forward.

Should a white partridge or a white fox rise from the snow and go away as the sled approaches, the entire string of dogs, howling and barking, will start in chase. The leader dashes in the opposite direction, and his class-mates pull the team back.

At the same time he barks loudly, as if making out that the bird or fox really went the other way. A good dog leader is worth a fabulous sum to the poor people—fifty rupees, or 50 pence.

No whip is used in driving, but the driver keeps his team keen by continual cries: "Norwah-norwah!"—to the left; "Posza—posza!"—forward; the dogs have great endurance, and can travel and eat during a sled fifty miles in a day. Races are sometimes held and a team will gallop a short distance at twenty-five miles an hour.

Once the dogs have been over the ground, they will never lose their way.

Nothing In Old Stories

"Last Spike" Linking C.P.R. Was Probably Plain Iron

The "last spike" that was driven at Craigellachie, marking the joining of the east and west main construction of the Canadian Pacific Railway, was probably just plain iron—the same as a million other spikes used in the construction.

E.C. Boyes of Craigellachie heard from his father that he had planned to use gold and silver needles instead of ordinary spikes. Boyes asked the C.P.R. about the spike and what happened to it.

As far as railway officials could learn, Boyes' spike did not fit an ordinary spike. It wasn't even moved immediately after the ceremony but probably disappeared as scrap iron years later when repairs were being made.

Most Everybody Plays

Husbands who have been deserted by wives for bridge parties all winter, remarks St. Thomas Times-Journal, will now get their own back by deserting their wives for golf all summer. It may be noted, says the King's, that quite a few husbands play bridge and that some wives also play golf.

Seeing isn't always believing; one sees lots of people one can't believe,

London paid an average of \$1,600 to its policemen last year.

W. N. U. 1955

SWEEPING REFORMS TO BE MADE IN LONDON POLICE

Something To Remember

Letters Written On Linen Paper Weigh More In Damp Weather

A wet day is not as good a day to mail a letter as a dry day.

This was demonstrated when presented to a dinner in honor of James Farley, United States postmaster general, over two hundred invites in charge of invitations to the dinner had elaborate invitations printed on choice linen. Enclosed in the envelope was a subscript card merely reading "Please do not fold, bend or crease, and a return envelope."

Having some misgivings about the weight of the invitation, the committee took a sample to the post-office and had it weighed. It came within the limits of the maximum weight, so the committee were mailed.

The great scientific principle which the committee overlooked, however, was the sample invitation was weighed on a dry day, and the actual mailing done on a wet day.

It was found the linen paper, in addition to being less scientific, principles concerning liner paper, began absorbing moisture, adding weight. It became overweight.

The post-office department put "The rents due" stamp on the invitation, but it had mailed a dry invitation and had a right to expect the post-office department to deliver a dry invitation.

The Ideal Parents

Standard Set Up By Children Not Hard To Reach

Here are the ideal parents:

"The mother—she lets the children pass the candy when company comes; she is a good cook and makes a fuss over her children when they cook a meal; she is a good housekeeper; she lets them go see the old friends and lets her friends come to their home; she allows her children to lick the frosting dish, has cookies and candy in the house; and asks the youngsters what they like for supper."

"The father—he is a good provider; he lets his wife use his tools; he is kind to animals; he plays baseball with the children and is a good batter; he helps the children with their home work; he takes his sons hunting with him; and, he helps his wife with the housework."

These aren't the requisites drawn up by a child expert; they are the mandates of the children themselves as obtained from questionnaires from the students at Thorsea Park School in Paris, a suburb of Cleve'sland.

Established Quarter Century

Since the University of Alberta was founded at Edmonton 25 years ago, 2,168 students have graduated. Of those still living 1,366 are residing in Alberta, 359 in the other provinces of Canada, 123 in the United States and 37 in other countries.

Helpfulness cannot be standardized. Giving until it hurts is not a true measure of charity. Some are easier than others.

Russian hunting expeditions expect to capture 180 whales and 138,000 seals in Arctic waters this season.

Two Hundred Years Old

Harpsichord In Suite Of Great Age Still Belongs To Us

A music-maker of undisputed sweetness, in spite of great age, was recently taken to Montreal. Eight feet long, more than four feet wide and nearly two feet deep, the most remarkable feature of the instrument is that it is not cracked, a military salute and a bugle run the morning air.

It is the grave of "Old Tom," gallant old war horse which died at the venerable age of 41.

"Old Tom" favorite many years with United States marine corps, was born in New York city in 1892, on New Year's Day.

Two years later he "enlisted" with the leathernecks.

During the Spanish American war, he was a favorite of sailors and heard the whines of recruits for "Old Tom" was wounded in a battle.

He recovered, and again saw active service, particularly at Guantanamo and San Juan Hill, where Theodore Roosevelt and his Rough Riders won undying fame.

At "Old Tom's" burial 80 marines rigidly stood at attention; it was these marines who since 1928 paid for his apples, sugar and fine hay that kept him contented and happy until his last days.

Greater Than The King

Abbott Of Westminster Once Took Advantage Of Superiority

On January 10, 1955, the cross upon King Edward is dead.

As Dean of Westminster Dr. Bonham had been largely responsible for the arrangements of King Edward's coronation. King Edward is said to have had some differences with Bonham over the coronation plans and said "Please remember I am King of England."

To this Dr. Bonham replied "Remember, Sire, I am the Abbott of Westminster."

Westerners will be reminded that in earlier times the Abbott of Westminster was practically superior to the King.

A model of a honeycomb nearly six feet wide has been installed in the Institute of Bee Research in Berlin, Germany.

Buried With Military Rites

Gallant Old War Horse Was Favorite Of U.S. Marines

The sod is green over a new grave at the naval yard in Portsmouth, New Hampshire. When the gallant warrior died, he was 41 years old, his eight teeth cracked, a military salute and a bugle run the morning air.

It is the grave of "Old Tom," gallant old war horse which died at the venerable age of 41.

"Old Tom" favorite many years with United States marine corps, was born in New York city in 1892, on New Year's Day.

Two years later he "enlisted" with the leathernecks.

He recovered, and again saw active service, particularly at Guantanamo and San Juan Hill, where Theodore Roosevelt and his Rough Riders won undying fame.

At "Old Tom's" burial 80 marines rigidly stood at attention; it was these marines who since 1928 paid for his apples, sugar and fine hay that kept him contented and happy until his last days.

Gold Discovery At Coast

Rich Quartz Reported Found On West Coast Of Vancouver Island

Gold-bearing ore has been discovered on the west coast of Vancouver Island, according to word received from the British Columbia Department of Mines. The discovery is reported to have been made by prospectors on Hermit Arm near Ahousat. Four hundred pounds of quartz from this vicinity were taken to Vancouver and examined and found to have a surprisingly high gold content.

It has been decided in court that birds have a legal right to nest in trees. This must be a great relief to the birds.

Fragrant Herb Very Useful

Possession Of Mint Was Once Measured By Weight

Mint is a very fragrant plant, although it has come down in the world, for at one time this fragrant herb was the associate of kings and its possession a measure of wealth.

The mint grow wild all over Europe, and the individual differences species have been noted for centuries. Pliny wrote of it in A.D. 70, and in the days of ancient Rome mint was used as a bath-salt, as a wreath to cure headache, and as a herb to spread over the floors of temples and public buildings.

Mint is one of the plants of the Bible, and in the Book of Matthew you may have read the Pharisees paying tithes of mint, anise and cummin. It is not a doubtful that such a plant may be purchased in bushes for a penny a head.

The spearmint (*mentha viridis*) now used in such large quantities for the production of chewing gum, is a native of many hedgerows. Possibly it was the same species which the Indians used in their medicine to add flavor, a custom which has been passed on to the present day. As a seasoning, there are several methods of using mint.

In England we regard mint sauce as a delicacy when bacon is eaten. Italy is often boiled with vegetables, and perhaps it was from the Italians that we learned this method of seasoning.

The peppermint of commerce is obtained from the leaves of mint, which is used in sweet and medicinal preparations for colds. Menthol also comes from the young leaves of a mint. In fact, there seems to be no end to the uses to which mint has been put.

Just Two Times Two

Farmer's Contract Looked Good But Was Impossible To Fulfill

Early in the eighteenth century a farmer made a contract which he thought was a good one for him. He undertook to deliver for the sum of £1,000 a ton of turnips on October 1st, and £1,000 a ton of onions on April 1st.

"Old Tom" favorite many years with United States marine corps, was born in New York city in 1892, on New Year's Day.

Two years later he "enlisted" with the leathernecks.

During the Spanish American war, he was a favorite of sailors and heard the whines of recruits for "Old Tom" was wounded in a battle.

He recovered, and again saw active service, particularly at Guantanamo and San Juan Hill, where Theodore Roosevelt and his Rough Riders won undying fame.

At "Old Tom's" burial 80 marines rigidly stood at attention; it was these marines who since 1928 paid for his apples, sugar and fine hay that kept him contented and happy until his last days.

Profitable Poultry Shipments

Good Prices Obtained In United Kingdom For Manitoba Birds

The 1,000,000 pounds of poultry raised each year in the Canadian prairie provinces is finding a ready market in the United Kingdom.

Poultry Farm actually netted three to four cents a pound higher than the domestic price in Winnipeg or Montreal. This information was imparted to the House of Commons by Hon. Robert Wier, Minister of Agriculture during a recent debate.

The first trial shipments were 33 carloads in all—came from Manitoba, and the reception accorded the Canadian poultry in the United Kingdom was exceedingly gratifying.

Denials for meat exportation policy have been made, and Mr. Wier was asked if the country had done enough good in relieving local market conditions. No person, he commented, could give a safe estimate as to the limit the United Kingdom market could absorb.

Only Three Methods

Only three different means have been found to prop ships of any size through the water, the paddle wheel, the screw, and the jet—that is, pumping the water in through the bow and out at the stern and "sucking" the ship along.

Keeps Money Circulating

Business, generally is better. Keep the dollars circulating. If you hear the story, haven't you, of the boy who five dollar bill went to the bank and was finally destroyed? No person, he commented, could give a safe estimate as to the limit the United Kingdom market could absorb.

Gardening Notes

By Gordon Lindsay Smith

Before finally disposing of the sowing and planting end of the flower garden, it is well to check over the various types in order to make sure that all the seedlings are compiled with. One's garden should be balanced. That is, there must be variety of colors, shaded corners, as well as hot, dry ones, planted with something subtler, a variety of tall things, shorter, scented blossoms like Stocks and Nicotiana, continued bloom from June until frost, flowers and vegetable garden screened with tall, bushy things and annual climbers and a fair showing of the new and varieties improved both single and double flowers.

An Intensive Vegetable Garden:—It is really remarkable the amount of vegetables that can be produced in a plot twenty feet square. Sufficient tomatoes for a small family will be grown in a plot of this size, and, of course, should be staked and may be set in eighteen inches apart. The stakes are six feet long and are driven in close to the plant when the latter is set out. Pinch off all side shoots, training the single stem straight and strong.

The peppermint of commerce is obtained from the leaves of mint, which is used in sweet and medicinal preparations for colds. Menthol also comes from the young leaves of a mint. In fact, there seems to be no end to the uses to which mint has been put.

Tomato plants from the seeds of the previous year will be set out in the garden in late spring. Tomato plants are set out in the garden in late spring, training the single stem straight and strong.

The carrots are set in the garden in the fall, and the carrots will give very good returns and should have from twelve to fifteen inches between rows. Spinach is also a heavy yielder and as it grows it will be necessary to thin it out every week.

Carrots and beets will give very good returns and should have from twelve to fifteen inches between rows. Spinach is also a heavy yielder and as it grows it will be necessary to thin it out every week.

Carrots and beets will give very good returns and should have from twelve to fifteen inches between rows. Spinach is also a heavy yielder and as it grows it will be necessary to thin it out every week.

FANCIFUL FABLES

W. N. U. 1955

Greatest Reindeer Trek In The History Of The Arctic Regions Is Now Nearing An End

Greatest reindeer trek in Arctic history nears its end.

It's a thrilling saga.

Lapp and Eskimo reindeer punches batted cold and blizzards and snowstorms. They have been on a hard year in a meaty feet which will mean permanent food supplies for dwinding Eskimo population of the northern rim of Canada.

Now looks as if 3,000 reindeer, a sturdy animal easily domesticated, will be successfully delivered, with the help of the government's reindeer ranches, east of the Mackenzie delta next year.

In 1928 the plight of the Canadian Eskimos reached a point where Ottawa decided the native Ottawa needed a permanent food supply. Eskimos faced starvation. Caribou migration had taken heavy toll. Porsild brothers, two Arctic biologists, were employed to survey Canadian reindeer ranching prospects. They found reindeer ranching feasible.

Their first reindeer ranches were completed in 1930. Ottawa contracted with Lomen brothers, Alaskan reindeer pioneers, for delivery of 3,000 Alaskan deer. The Lomen plan was offered \$60 each for deer delivered on the Mackenzie reserve.

With the arrival of 3,000 healthy animals had been rounded up in the Buckland Valley on the west coast of Alaska, fully 1,800 miles by coast line from the northern Canadian border. The herd started its slow trek east, with native herders and drivers. It took a long time, the route being followed by an airplane survey. They thought they could reach Canada in a year and a half. Already three years and a half have passed and it will be another year before the herd is delivered at the reserve.

Some reindeer punches more than once faced death.

They took their wives and children with them.

One child died. They had 3,000 adult deer when they started.

Wolves, bears and preying food needs cut 1,000 from that total. But sturdy skiers reached Canadian territory this spring with 2,000 of the original herd and 300 young deer.

Wolves frequently cut into the big herd, killing one or several at a time. Wolves would raid the herd, kill six or seven animals, stop to devour what they wanted and come back for more.

Two years ago more than 500 reindeer were lost in a storm. Herders pursued them, ran short of food and subsisted for a week on a cup of flour and water. They had to depend on their equipment. It was all that was left to the herd.

Tom Wood, Eskimo camp manager, was lost for three days in a storm. In that country temperatures can drop as cold as 60° below zero. At that time there is an unexpected uncharted waste, terror of Eskimo and white explorer alike. Wood faced death. He is a man of intelligence who had been to a mission school in Alaska. His strength came from Eskimo. His life ended when the Eskimos had seen Wood.

He prayed to God.

Today he says that, through the storm, he saw the dim figure of a woman.

He struggled to get feet based on, footprints, trapping signs, tracks of trapper's wife, by chance, had stepped outdoors for a few moments and the Eskimos had seen her. She had not seen Wood.

But the Eskimo had seen the woman and feels it was God who answered his prayer.

Reindeer skins are skins throughout the long journey. It is almost impossible to freeze in such clothing. They were forced to ski rapidly to round up stragglers behind, found themselves perspiring in sub-zero weather. Their double parkas were damp with perspiration for days but the Eskimos and Lapps pulled through.

It was a terrible trip. Two crews of herders were forced to quit. Now most of the work is done under charge of Andrew Bahr, veteran Lapp herder, and Tom Wood, Alaskan Eskimo, camp manager. There are three other Lapp herders and three Eskimos, besides families of Eskimos and Lapps. When they arrived there the Eskimos asked only for hymn books.

and Bibles. They were glad to be alive.

When the deer reach the new reserve next year the government will domesticate the animals, teach Eskimos to take care of them, as farmers would care for work horses or milk cows. The Eskimos have both antelope and caribou. The moose can haul a 200-pound load and provide a milk supply for the natives to eat.

Supervision will be strict so that Eskimos will not kill off the precious herd and, at the same time, it is expected that tame deer in Canadian Arctic will equal those of Norway's far northern Laplanders.

Burns Without Blaze

Abandoned Texas Coal Mine Smokes For Thirty Years

For 30 years an abandoned coal mine at Cisco, Texas, has been a bane of ashes and smoke that smokes but never blazes.

Wicks of smoke curl from the ashes and slate near Lake Cisco, a mile from the town. The abandoned mine resembles a dumping ground more than a coal shaft. Floyd Cooper, Cisco pioneer, believes the tunnel was dug in 1880 by settlers who sought fuel for their homes rather than coal for commercial purposes.

The coal was soft, white-colored and as treacherous as quick sand. Recent investigators believe the tunnel of the burning mine extends for half a mile under the hill upon which Rand College is now located.

There were no signs of fire when investigations were completed. Ottawa contracted with Lomen brothers, Alaskan reindeer pioneers, for delivery of 3,000 Alaskan deer. The Lomen plan was offered \$60 each for deer delivered on the Mackenzie reserve.

With the arrival of 3,000 healthy animals had been rounded up in the Buckland Valley on the west coast of Alaska, fully 1,800 miles by coast line from the northern Canadian border. The herd started its slow trek east, with native herders and drivers. It took a long time, the route being followed by an airplane survey.

They thought they could reach Canada in a year and a half. Already three years and a half have passed and it will be another year before the herd is delivered at the reserve.

Some reindeer punches more than once faced death.

They took their wives and children with them.

One child died. They had 3,000 adult deer when they started.

Wolves, bears and preying food needs cut 1,000 from that total. But sturdy skiers reached Canadian territory this spring with 2,000 of the original herd and 300 young deer.

Wolves frequently cut into the big herd, killing one or several at a time. Wolves would raid the herd, kill six or seven animals, stop to devour what they wanted and come back for more.

Two years ago more than 500 reindeer were lost in a storm. Herders pursued them, ran short of food and subsisted for a week on a cup of flour and water. They had to depend on their equipment. It was all that was left to the herd.

Tom Wood, Eskimo camp manager, was lost for three days in a storm. In that country temperatures can drop as cold as 60° below zero. At that time there is an unexpected uncharted waste, terror of Eskimo and white explorer alike. Wood faced death. He is a man of intelligence who had been to a mission school in Alaska. His strength came from Eskimo. His life ended when the Eskimos had seen Wood.

He prayed to God.

Today he says that, through the storm, he saw the dim figure of a woman.

He struggled to get feet based on, footprints, trapping signs, tracks of trapper's wife, by chance, had stepped outdoors for a few moments and the Eskimos had seen her. She had not seen Wood.

But the Eskimo had seen the woman and feels it was God who answered his prayer.

Reindeer skins are skins throughout the long journey. It is almost impossible to freeze in such clothing. They were forced to ski rapidly to round up stragglers behind, found themselves perspiring in sub-zero weather. Their double parkas were damp with perspiration for days but the Eskimos and Lapps pulled through.

It was a terrible trip. Two crews of herders were forced to quit. Now most of the work is done under charge of Andrew Bahr, veteran Lapp herder, and Tom Wood, Alaskan Eskimo, camp manager. There are three other Lapp herders and three Eskimos, besides families of Eskimos and Lapps. When they arrived there the Eskimos asked only for hymn books.

Patient Almost Boses Job

New Gadget Makes Him Master Of Painless Dentistry

Practitioner dentistry—almost—with the patient the boss of the job, is the latest gift of science to man.

With the new gadget, the patient with the aching bicuspids or rear molar, sits in the dentist's chair holding the remote control switch with which he can shut off the drilling when he desires.

The dentist now becomes a fixture like a radio or victrola to be turned off when he begins to "get on your nerves."

"The remote control has this advantage," J. C. Fortchuk told a group of skeptical practitioners clustered around a working model of the contraption at Atlantic City. "It enables the dentist to do his work more pleasantly and it enables the patient to keep calm through the knowledge that he can stop the drilling at any time."

"The patient with the confidence inspired by having remote control in his hands screws up his much moral courage that he can sit up and march home than he could without it."

Historic Barrack Removed

Workers Remove Barrack Occupied By Royalists One Century Ago

Old and riotously, the last vestiges of the group occupied the Royal North West Mounted Police at Medicine Hat, back in 1882, have been destroyed.

Fifty years ago it was the officers who stood alone facing fire and destroyed the other police buildings which in their day were the protection of peaceful settlers against roving bands of Indians and border outlaws. The buildings were commanded by the Royal Northwest Mounted Police, a unit of mounted or mounted constables during the coming season was considered in detail. The opinion of the meeting was that the total volume of import traffic would considerably exceed the 1832 tonnage.

General Smith, specific representative of the Hudson Bay Company also reported that arrangements were being completed to take care of anticipated large movements of livestock through Churchill, Birkdale and Cardigan markets.

More Ships From Churchill

Volumes Of Traffic Expected To Exceed That Of Last Year

At least twice as many ships as last year will load at the port of Churchill, Manitoba, in the fall, according to information received at a meeting held in Saskatoon.

Last season 10 boats visited the port, 100 tons of freight, and the Daigleian Steamship Company had now arranged for the first boat, the S.S. Penwyth to load at Glasgow July 17, Newcastle-on-Tyne July 25, and at Antwerp July 28. The company expects to have the vessel in the session one month earlier than last year if the underwriters were willing to extend the open dates for hull and machinery insurance in the same manner as Lloyd's were willing to underwrite import and export cargo.

Regarding ocean freight rates to Churchill, announcement was made that the Daigleian Company was prepared to accept the same ocean rates as the Canadian Pacific and continental rates as now applied to Montreal. This was the same arrangement as was last year.

The relation of the reduced marine insurance rates recently obtained by the Daigleian may be a factor in the negotiations with Lloyd's, but the rate is to be negotiated with Lloyd's to develop of export traffic to four, millifluts, livestock and packing houses and dairy products was considered by the council.

The date of arrival of various commodities during the coming season was considered in detail. The opinion of the meeting was that the total volume of import traffic would considerably exceed the 1832 tonnage. General Smith, specific representative of the Hudson Bay Company also reported that arrangements were being completed to take care of anticipated large movements of livestock through Churchill, Birkdale and Cardigan markets.

New Light On Evolution

Discover Brain Of Gorilla Of Very High Type

Discovery in a gorilla of a brain of higher type than ever before found in an animal—near the human brain in size and complexity above all record—was announced by the Smithsonian Institution.

It sheds new light on the evolution of the animal brain upward toward that of the human level, according to recent evidence of relationship between man and monkeys. The brain belonged to Okero, little three-foot baby gorilla, that died several months ago at the Washington Zoo. It was studied by Dr. George H. Roman, of the National Museum.

The discovery of Captain Ward's brain, Captain Ward is famed for his feat of sailing a Chinese junk across the Pacific to Victoria, thence through the Panama Canal to New York, more than 10 years ago.

Captain Ward is famed for his feat of sailing a Chinese junk across the Pacific to Victoria, thence through the Panama Canal to New York, more than 10 years ago.

His teeth are in bad shape," said the dentist. "You should have a bridge put in at once."

"How much will a bridge cost?"

"About seventy-five dollars."

"Say, doctor, can't I get along with a small culvert?"

Canadians Are Healthy

Record Health Year In Canada In 1932

The year 1932 was a record health year in Canada, in fact, of increasing and unfavorable human conditions. This is indicated by the very low death rate, which prevailed among nearly 1,250,000 Canadians insured in the industrial department of the Canadian Life and Casualty Insurance Company. This large cross-section of the Canadian population gives a true health picture of the population in general, it was said. The death rate of these insured Canadians last year was 7.7 per 1,000, a decline of 4 percent from the previous minimum recorded in 1931.

Health Come Cheaper

"One tooth is in bad shape," said the dentist. "You should have a bridge put in at once."

"How much will a bridge cost?"

"About seventy-five dollars."

"Say, doctor, can't I get along with a small culvert?"

Simplifying Method Of Sealing Messages Developed In France

An automatic radio, immensely simplifying the process of sending messages, has been developed in France. The messages can be sent by anyone knowing how to read, obviating the necessity of a trained wireless operator. It works by means of knobs which are turned like the knobs on a radio receiving set. The letters of the alphabet and various signal codes are printed on small cards. A knob, messages thus being spelled out.

The radio population of the world is estimated at 10,000,000,000 persons compared to some 2,000,000,000 humans.

The pineapple will not grow where the frost bites.

Russia estimates that its present population is 127,000,000.

Aeroplanes Will Be Used In A New War To Be Waged In Effort To Exterminate Locusts

Old Practice Becomes New

Need Of Hard Grits In Poultry House Again Stressed

Some old practices become new again. That can be said of the use of insoluble grits in the poultry house. For years now the poultry chemical department at Saigat Plain are studying methods by which locust swarms may be exterminated while on the wing, and it was in connection with these experiments, just lately, that it was discovered to obtain quickly as possible a considerable number of live locusts.

To meet this demand the government of Kenya shipped several crates of insects to London by Imperial Airways. The insects had been put on board after having been packed in ice. The locusts were landed at the London airport, and were sent immediately to the research laboratories on Silwood Plain.

Here was a real catch, though a certain number had died on the journey; there were sufficient left alive to provide material for a number of important tests, during some of which the insects were placed in wind-tunnels to determine whether they could pick up odors and seek fragrant parts of the soil of the range.

The insoluble grit acts as teeth for the chickens in the gizzard. It helps to grind up food and therefore has a tendency to prevent crop damage.

The practice of giving the grits makes the gizzard hard and muscular, insuring healthy action of the entire system.

Strange Coincidence

What Loader Gets Same Car Twice On Different Occasions

K. H. Johnson, Alberta wheat pool agent at Courch, is wondering when it is going to happen again.

On August 23, 1932, Johnson loaded a railcar with wheat, No. 2 wheat, with No. 2 wheat for Vancouver. On August 27, 1932, he was loaded No. 2 wheat again for Vancouver when he noticed it was car No. 504457.

Coincidence might have been引起的 by the fact that he had the same double," he loaded car No. 504455 and No. 2 wheat for Vancouver January 9. And a few days ago car No. 504485 came back again to be loaded with the same wheat for same destination in the same crop year as in the thousands.

Johnson is wondering whether it is possible to prevent this happening again.

Amateur Broadcasting Simplified Method Of Sending Messages Developed In France

An automatic radio, immensely simplifying the process of sending messages, has been developed in France. The messages can be sent by anyone knowing how to read, obviating the necessity of a trained wireless operator. It works by means of knobs which are turned like the knobs on a radio receiving set.

The radio population of the world is estimated at 10,000,000,000 persons compared to some 2,000,000,000 humans.

The pineapple will not grow where the frost bites.

Russia estimates that its present population is 127,000,000.

In a fresh war which science is waging against locusts, the insect pests which cause such widespread destruction, the speed of air transport is now playing a valuable part.

Experiments are being conducted in the chemical department at Saigat Plain are studying methods by which locust swarms may be exterminated while on the wing, and it was in connection with these experiments, just lately, that it was discovered to obtain quickly as possible a considerable number of live locusts.

To meet this demand the government of Kenya shipped several crates of insects to London by Imperial Airways. The insects had been put on board after having been packed in ice. The locusts were landed at the London airport, and were sent immediately to the research laboratories on Silwood Plain.

The practice of giving the grits makes the gizzard hard and muscular, insuring healthy action of the entire system.

Result Of Old Feud

Emberled Forest Dwellers In England Blamed For Fires

It is said that the constantly recurring fires in Ashdown Forest are the result of a feud that dates from the time of Henry VIII, King of England, who gave the peasant grazing and forest rights for tending the deer he hunted.

The feud is being waged, according to many people, by those who have been spoken to, by emberled forest dwellers.

These men feel that the forest is their heritage, and that property owners are gradually taking it away from them. They are fighting for it with fire.

They have lit fires in Ashdown Forest for many years, but recent abnormally dry weather has given the fire raisers greater opportunities for destroying the forest.

Nearly 2,000 acres belonging to people who have been slighted during the past few weeks. Ashdown Forest covers approximately 7,300 acres.

A reporter discussed the motives for each acre, and discovered specific reasons in each case.

"In the olden days many emigres hid in the forest and spent their lives defying law and order. The same spirit seems to live on.

"These fires are being lit through sheer 'cussedness.' The board of conservators reported the presence of forest fires and maintained law and order. It is therefore the natural enemy of the men of the forest, and is to be despised."

British Conservators Suggested

Suggestion that a conference between Canadian and New Zealand representatives of affected interests be held in New Zealand in an attempt to iron out difficulties concerning the importation of timber from the south island into Canada was made at a recent meeting of the British Columbia division of the Canadian Manufacturers' Association in Vancouver.

Inquiry From Jamaica

A letter from the Canadian government to the Regia Board of Trade from Kingston, Jamaica, asking if any Saskatchewan factories could quote prices on orange crates knocked down into bundles. "If they make egg boxes they can surely make orange crates," says the letter.

Vegetables are being dried by a new process in Sweden to preserve essential vitamins contents.

Two hours after the British engineers from Russia reached England the Russian Trade Delegation in London left for Moscow without being able to arrange a new trade pact with the British Government. On the above shows the Soviet Ambassador to England, M. M. Ozerki, shown holding a bouquet of flowers.

HEART OF THE NORTH

CHAPTER X—CONTINUED.

About the whole post there was only one telltale sign of something dark and sinister. In their hurry to get away the Indians had left behind them a stamp in the sand at the clearing. Alan picked up old Pence's story-stick. Once or twice he had wondered what they had done with that old white-haired wight. They would not mention themselves, he knew, but he could find the trail here to report and bring the police hot on their trail. How had they dealt with old Pence?

As he picked up the stick, he saw a broad red stain on one end of it, a crimson splash already turning dark; and a few hoary-white hairs clinging to the wood. And this story-stick which old Pence had been whittling at, carving clumsy bison figures, seemed to him like the witness of many a tale of death and violence of mind, of the imp-thin and lonely gold trails, of dog teams and pack-horses, of broad-shouldered men under heavy, portly loads and of women with faces pale as face and figures, this story-stick at his finger tips from its rounded handle, was completed now.

CHAPTER XI.

How To Damn An Enemy.

A taking and determined effort to entice off a strange happening at En Traverse Lake. He had been fishing there at an inlet for barbutines, he said—half-sleep that morning, with the fish fine tied around his big to a wondering sound in the sky had roused him; and upon awaking, he held back; fearful thing came out of the southern horizon and rear out over the lake.

The sight of it, said John Afrald—of this—had never told him from the water, he said, near Goose Point, and so, a few minutes later it rose and started across the lake for the south shore. He had watched it as longer, he scurried to the bank and dashed into his boat, took his gun and rowed across the rocks; for the dreadful thing might have been angry and questing for food.

Frank Pedneault listened very thoughtfully to the Indian's story, and then began drawing some conclusions. He knew that the Indian's shiny monstrosity was a possible key to many puzzles. To the best of his recollection he had never yet seen Alan Baker throw down a job merely because it was tough. And he knew that the Indian had been and still determined to wipe out the first stinging defeat and save Joyce MacMillan's dad. Bill had intimated that Alan had gone after those bandits; without violating his oath of secrecy, he had dropped a few broad hints to that effect.

for BITES
Insects, snakes, or scorpions—
the best treatment is plenty
of cold water. Soak the part
30 seconds, heels and cleanse.
Draws out the poison!

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 1995

Pedneault drew a conclusion: "Alan was out to gain himself flying machine to hunt them men out of the world. That Asazah made that incoming trip. He and Bill arranged to meet somewhere. He picked Bill up and now they're over there together on the trail of the Indians."

As he stood in the barbutine den gazing wistfully across the Mackenzie to the distant hills, he felt all deserted by his comrades. "And they let me out in the cold. Didn't tell me one d-d thing about it. To h— with 'em! Hurry! But Lord! I wish on a trick like that—or Lord, I wish"

Not absolutely sure of his conclusion, he started out along the grassy trail toward the Mackenzie flower garden where Elizabeth Spaulding was reading. He was pondering, in vague outline, a trick of his own. It was a serious matter, and he wanted to be certain of his guess before he wrote with a scheme like that. Elizabeth was fully aware of Alan's plans; since she had been waiting here for him to return and marry her.

Elizabeth did know the story. But she did not know, "Not daring to go to her himself, he had employed Whipple to casually tell her that Baker had stolen valuable government property at Edmonton, had broken several flying regulations, and was considered a traitor." She was told the hour he showed up in civilization. No longer a policeman, and having no authorization of any sort, Baker might even be charged with second-degree murder if he killed any of those bandits.

The news affected Elizabeth very little. Superintendent Williamson and Colonel Steele were both good friends of Alan's and both had power in high places. His plan should be successful. There is a lot of good that can be reflected in success.

When Pedneault came across and began asking roundabout questions, Elizabeth told him who she was.

She knew that Pedneault would repeat her words to Alan, if he got the chance; and Alan would thus hear from Elizabeth the person of her steadfast loyalty to him.

Very thoughtful, when he found out his guess had been correct, Pedneault walked back across the terrace to the mission hospital where Larry Young had been staying.

He had been writing letters of missing campers, of the imp-thin and lonely gold trails, of dog teams and pack-horses, of broad-shouldered men under heavy, portly loads and of women with faces pale as face and figures, this story-stick at his finger tips from its rounded handle, was reflected in success.

In a sudden, sharp turn away, Pedneault had tripped him, stolen the launch, and joined Baker's venture!

Unable now to go up the Alosacka and smash that plane, he found out, for his bitterness in managing things, that he was a good Alan and those men. At Williamson's commanding visit, he could then deal them some terrible blows. His enemies had played into his hands. Baker had bought out his share in the company and taken the law into his own hands and turned justice to private ends. Pedneault had given a false report and absconded with police property. Bill had been given supplies and sent them to Larry. He had a new gae-a-wal, had aiding in a criminal enterprise, and to crown it all, had deserted.

In knowing Williamson's foibles pretty well, Haskell foreseen the superimposition of the Indian's blunderbuss facts. He visited every town in the old stern officer's code, for he was a stickler for discipline. He would hardrock and Pedneault to the limit. He was a stickler for discipline, and made certain circumstances, and took the law into his own hands and turned justice to private ends. Pedneault had given a false report and absconded with police property. Bill had been given supplies and sent them to Larry. He had a new gae-a-wal, had aiding in a criminal enterprise, and to crown it all, had deserted.

Knowing Williamson's foibles pretty well, Haskell foreseen the superimposition of the Indian's blunderbuss facts. He visited every town in the old stern officer's code, for he was a stickler for discipline. He would hardrock and Pedneault to the limit. He was a stickler for discipline, and made certain circumstances, and took the law into his own hands and turned justice to private ends. Pedneault had given a false report and absconded with police property. Bill had been given supplies and sent them to Larry. He had a new gae-a-wal, had aiding in a criminal enterprise, and to crown it all, had deserted.

Haskell thought he had awaiting him the news that Trad'r MacMillan, whose innocence he had known, had been sold to the next door, probably to the same fate.

He said to himself, "I'll go to Chicago. The instrument, to be exhibited at a Rochester, N.Y., optics company, will be the only one of its kind in existence. No one would wish to buy it. I'll make a fortune."

He was already on his way up to barracks for rifle and gun, when he was accosted by a tall, burly, hairy-tanked man, Larry Young had prompted him to that.

Haskell took thought. If he was a man and smoothed out this Indian trouble, it would look very well in a report. It would be a sensational action, he said. "Alan! Alan! Alan!"

Down and reduce him in order. Be back here in three hours. I want the laun—"

WORLD HAPPENINGS
BRIEFLY TOLD

Orange juice produced in the British West Indies and imported direct is to be admitted into Canada free of duty.

The recognition by parliament of the services of Captain J. E. Bernier, veteran Arctic explorer, was suggested in the senate by Hon. J. P. B. Casgrain, of Montreal.

All German ships have received orders to fly the swastika flag of the Nazis, and the first vessel to do so in Vancouver harbor was "Ms. Oakland."

The immigrant resident population in Canada at the time of the census of June 1, 1931, numbered 2,075,353, of which more than \$115 per capita was found west of the Great Lakes.

The United Nations postal service will begin on May 15. The government observed the anniversary by putting to sea a fleet of new tri-motored "three-mile-a-minute" planes on its coast-to-coast route.

An 80-foot totem pole, one of the most beautiful ever to be presented to the Quebec zoological gardens at Charlesbourg by the Zoological Society, it comes from the Nass Valley of British Columbia.

Robert Avery Chapman, Winnipeg, now doing research work in entomology at McGill University, has been awarded the McGill Delta Upsilon Memorial scholarship. The scholarship is worth \$900.

With a view to encouraging commercial farm farming on a large scale between the Prairies and the north, between The Pas and Lake Winnipegosis will be leased under terms "favorable" from the point of view of the prospective fur rancher.

Commercial shipping between France and Canada, and the travel of French tourists to Canada and the two countries, will be facilitated by a convention signed recently, as a companion pact to the Canada-France trade agreement.

Proof that a goodly number of art patrons are still able to pay substantial prices for original works of art, given in the Royal Academy sales to date. One hundred and forty exhibits brought a total of \$15,420 this year as against \$14,720 for the same date last year.

C.P.R. Chief Praises Roosevelt

E.W. Beatty, President Of The C.P.R., Looks For Early Upturn Of Trade

E. W. Beatty, president and chairman of the Canadian Pacific Railway, has praised the "courageous and vigorous leadership" of President Roosevelt and of the people of the United States as well as the recent trade conversation between the president and Premier R. B. Bennett.

An article contributed to the "Boston Transcript," Mr. Beatty analyzed Canada's railway problem, especially the question of the economic conference, and said he looked for an early upturn in the volume of trade between Canada and the United States. Mr. Beatty wrote:

"I have no doubt that the economic conference will be a success. I hope and that the more or less free interchange of commodities between various areas will commence to make itself felt over the next few months. It is reasonable to suppose, also, that we may not long before we see the start of an upturn in the volume of trade between Canada and the United States.

"I am one of those who look hopefully towards the world economic conference, having something more in mind with respect to the men who are in positions to direct the struggles of the great nations towards economic salvation, and I am thus assured that our serious economic problems will soon be observed to take on a lessened aspect. The troubles of our railways will be accordingly lightened, but we shall then be faced with the still hardly less though provocative matter of competition in the world market. In this way executives have already directed much consideration and effort in this direction, and results have not been without considerable encouragement.

For Auction Failed

Japanese retaliation to Germany's aggression in China took a formidable form when the long-rehearsed Leipzig auction proved a complete failure, as was the result of an international boycott arranged by Jewish buyers.

Afrafia is able to live for thirty years or more under favorable conditions.

Radios In Great Demand

Next To Furs: They Constitute Biggest Shipments To Arctic

Radios constitute the biggest shipment of goods, next to furs only, sent into the arctic and traders now buying their stocks in Winnipeg to go into the arctic and purchasing all the better radios they can get used, they can get their hands on.

"The northland," said Col. Jim Cornwall in an interview at Winnipeg, "is going radio-mad every day. In fact, in the last country there even radios in the barrens lands want a radio. They will pay any price for them and some of the traders, I fear, are profiteering."

I know one trader who sold a radio for \$100 white fox skins.

These fox skins are worth their weight in gold and then some. But so is the radio and, of course, there is a lot of work about carrying the instruments and the heavy dry cells and batteries and the like. It takes two months.

Mrs. Hardie made the tragic discovery.

Mr. Hardie was born in Caledonia, Ont., but when quite young located with other members of his family at Thorold, Ont. There he received his education in the public and high schools.

On Christmas Day, he was married to the bride being Miss Nellie Becker, of Thorold. After the wedding, he came to Winnipeg. Mr. Hardie having secured a position in the Free Press office, he remained with the newspaper for six years. At the end of that period he became manager of the Toronto Type Foundry Co., succeeding J. C. Cromie as manager of the branch, and remained in that position until he took the same position for the past 35 years.

He travelled extensively and was a member of the Canadian Publishing house in western Canada. He was keenly devoted to the interests of the industry and his personal entertainment interfered with his duties as a business man, business always came first.

Mr. Hardie has more highly regarded than with many another in the organization for whom he worked.

Mr. Hardie was a member of the Winnipeg Press Association, the Graphic Arts Association, the Elgar Gold Club, the Carlton Club and Fort Rouge United Church. At Sunday night services, Mr. Hardie, Rev. Dr. Easday, the minister, referred feelingly to the loss sustained by the congregation.

Prominent Western Dies

Herbert J. Hardie Was Well and Favorably Known To Western Canada Printing Industry

The best known personality to visit from time to time the publishing industry in western Canada from the Great Lakes to Victoria, B.C., Herbert J. Hardie, known as "Herb" to his many associates, died suddenly Saturday afternoon, May 6th, age 63 years. Death occurred at the family residence, 999 Grosvenor Avenue, Winnipeg.

Mr. Hardie had been confined to his home for a few days with a heart affection. He had never been sick a day in his entire life, and the illness had been of a very mild character. It had been to the room of a daughter who has been ill for some time, and carried a tray to her with her evening meal. Setting the tray down on a table, in his own room Mr. Hardie laid down and died.

It is known only that a radio and some white fox skins. These fox skins are worth their weight in gold and then some. But so is the radio and, of course, there is a lot of work about carrying the instruments and the heavy dry cells and batteries and the like. It takes two months.

Mrs. Hardie made the tragic discovery.

Mr. Hardie was born in Caledonia, Ont., but when quite young located with other members of his family at Thorold, Ont. There he received his education in the public and high schools.

Exemptions On Taxes

Applies To Checks, Cream Or Eggs And Postage

Proposed changes in the tax on cheques, money orders and postal notes were approved by the House of Commons at Ottawa, when the special War Revenue Act was put through its final stages. Hon. E. N. Rhodes, Minister of Finance, moved that the proposed changes be issued for milk and cream to producers, and cheques issued in payment of eggs or poultry or poultry exchanges to producers. He also exempted certain agricultural products from the exemptions of wool growers in payment of wool to producers, and cheques issued by municipal corporations in receipt of unemployment relief.

"At the same time," he added, "there is a similar exemption in the case of money orders, and also a similar exemption in the case of postal notes."

The minister also added a clause to the bill which makes it clear that farmers and manufacturers' companies which have been exempted from the provisions of the act insofar as fire insurance business is concerned, are also exempt in respect to weather insurance.

The minister also added a clause to the bill which makes it clear that farmers and manufacturers' companies which have been exempted from the provisions of the act insofar as fire insurance business is concerned, are also exempt in respect to weather insurance.

Then again, you may be planning on a plain silk frock. You may be thinking of a blue, green, pale grey, dawn blue or fern green.

Style No. 864 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30 inches bust. Size 16 requires 3½ yards of 36-inch material.

Cost of pattern 20 cents in stamps or coins (coins are preferred). Wrap coin carefully.

CHARMING LITTLE MODES, SO Dainty Yet So Practical

Again puffed sleeves for the debutante, deb and youthful women wearers.

The bodice shows preference for a basque effect. And isn't the V-neck becoming?

Note how prettily the skirt is cut with panels at the center-front and the center-back. This smart arrangement is a definite plus.

A crepe silk print in orange and white made the original. It is very dainty.

A NEW SPIRIT OF OPTIMISM FOR ARMS PARLEY

Washington.—A new spirit of optimism for success at the Geneva arms conference was noted yesterday in London when invited privates by American officials as they analyzed reactions to the momentous declarations of President Roosevelt and Chancellor Hitler, of Germany and Italy.

From eight more nations, including Germany and Italy, the United States president received replies to his appeal for disarmament and peace. They brought to 20 the number of delegations that presented their views to the conference unaddressed to the rulers of 54 countries.

King George graciously acknowledged receipt of the message, adding that he had communicated it to government and the British empire's commanding part.

Premier Paul von Hindenburg's message was noted particularly because of the key position occupied by his country, with France, in the Geneva arms discussion.

"The time has come in which you show the world the way to end the international crisis, has met with hearty approval through Germany," Hindenburg's acknowledgement said.

In a note understood to convey the views of Premier Mussolini, the Italian government said it was ready to join United States and other countries in bringing about realization of the president's plan, "the most expeditious and effective way."

The next move by United States in the arms situation is expected to be made at Geneva.

Pay Homage To Loyalists

Premier Bennett Visits New Brunswick For Celebration

Saint John, N.B.—Canada's prime minister came to Saint John, New Brunswick, and joined the city of Saint John in paying homage to the United Empire Loyalists who landed on these shores 150 years ago. The sesquicentennial celebration meant a day of rejoicing in the city of St. Michael and St. George, the prime minister said, was in accordance with established constitutional practice.

Among parliamentarians of the government, reply to the Canadian prime minister's speech on the 150th anniversary of the 17th parliament." Premier R. E. Bennett told the house of Com-

mons: "The promotion of Sir George Pelegre in the Order of St. Michael and St. George," the prime minister said, was in accordance with established constitutional practice.

The answer was in reply to a question by Joseph Mercier (Liberal) from Quebec.

Asked: "Do the recent decorations granted in the Order of St. Michael and St. George and in the Order of St. Gregory the Great, mean that Canadians holding titles in any order may accept nominations in the same order?" such promotions do not carry any rank or title?"

Says No Election

Premier Henry Says No Appeal To Ontario For Election

Toronto, Ont.—Brief announcement was made by Premier George S. Henry that the Ontario government would not appeal to the electors in June of this year, "No, we are not going next month," was the Henry declaration.

Now, according to the Henry statement, the newspaper says there is every indication around parliament buildings, however, that the wheels of preparation for an election are beginning to gather speed.

Throw a Bomb

Attempt Is Made To Assassinate Chinese Envoy

Flushing, China.—An attempt was made to assassinate George S. Henry, and the Ontario government would not appeal to the electors in June of this year, "No, we are not going next month," was the Henry declaration.

Now, according to the Henry statement, the newspaper says there is every indication around parliament buildings, however, that the wheels of preparation for an election are beginning to gather speed.

Plans World Flight

Wiley Post Will Make Solo Attempt To Circle Globe

Oklahoma City—Wiley Post, co-holder of the round-the-world flight record, announced that he would take off about July 1 in a solo attempt to circle the mark.

A stop is planned at Edmonton, Alberta.

The flight, Post said, will be made in the "Winnie Mae," in which he and Harold Gatty circled around the globe in eight days, 16 hours and 51 minutes, in June, 1931. The plane will carry a new motor.

"I am simply going out to set a new record, my personal ambition," was Post's only comment. "I will have no backer, no manager and no backers."

Instead of a human companion, Post will be aided by a robot which he has been testing for several weeks. Post expects the robot to relieve him of the task of flying, leaving him free to navigate and rest.

Under plans announced, the route would be much the same as that followed by Post and Gatty. Post would leave from New York with the intention of making a direct non-stop 3,500-mile flight to Canada. The route would make a 4,300-mile jump over Russia, which probably would be broken at 2,600 miles for re-fueling. From Russia he plans to fly 2,200 miles over water and ice to Canada, and then 1,450 miles to Alaska and 2,100 miles back to New York.

The rebuilt plane will have a cruising speed of about 170 miles an hour and top speed of 225 miles an hour.

Ban On Titles

Clain Rule No Title Binding On His Majority Government In Canada

Ottawa, Ont.—It is the considered view of the government that the 1919 motion with respect to honors adopted "by a majority vote of the members of the House of Commons of the 13th parliament, is not binding on the majority government in Canada, or on the 17th parliament," Premier R. E. Bennett told the house of Com-

mons.

The promotion of Sir George Pelegre in the Order of St. Michael and St. George, the prime minister said, was in accordance with established constitutional practice.

Among parliamentarians of the government, reply to the Canadian prime minister's speech on the 150th anniversary of the 17th parliament." Premier R. E. Bennett told the house of Com-

mons: "The promotion of Sir George Pelegre in the Order of St. Michael and St. George," the prime minister said, was in accordance with established constitutional practice.

The answer was in reply to a question by Joseph Mercier (Liberal) from Quebec.

Asked: "Do the recent decorations granted in the Order of St. Michael and St. George and in the Order of St. Gregory the Great, mean that Canadians holding titles in any order may accept nominations in the same order?" such promotions do not carry any rank or title?"

Will Not Resign

Premier Bennett Says Government Will Not Resign Over Senate Defeat

Ottawa, Ont.—The government will not resign because of the defeat in the Senate of the bill to expand the Senate, the judges at the Supreme Court of Canada said. Prime Minister R. E. Bennett said in answer to S. W. Jacobs (Lib., Cartier), in the House.

Mr. Jacobs harked back to the speech by Mr. Bennett in respect of the railway bill, when he said that if the government dismissed any of the proposed Canadian National trustees, and the senate refused to co-operate in a joint session to make the bill a law, he would resign. He asked if the action of the senate would have the same effect.

"I have no such intention," he replied. "I never did intend it should it be so, except in the case of a joint resolution."

Get Job Term

Denton, Iowa—Twelve men arrested at a farm sale here April 28, pleaded guilty in district court recently, to charges of contempt of court and resisting services of a court process. Judge Homer A. Fuller sentenced each defendant to one year in state penitentiary on the resistance charge, but issued bench paroles.

Deaths On Strawberries

Ottawa, Ont.—Two cents per pound will be added to the value for duty of strawberries imported into Canada.

On May 1 to July 31, 1934, when entered under the intermediate or general tariff, it was announced by

the department of national revenue.

Former Inspector Sentenced

Crime Career Of C.S.I. Employee Is Revealed

London, Eng.—An astonishing career was revealed at Old Bailey, when Arthur Hay, aged 45, former inspector of the Canadian National Railways was sentenced to three years imprisonment when he was found in possession of suitcases from railway trains in all parts of the country, containing property valued at nearly \$15,000.

It was stated Hay was following 300 miles of railway lines and American railroads. He was stated to have been convicted of stealing in 1908, in England, after which he went to South America and worked on a rubber plantation. He joined the Royal Northwest Mounted Police and later served in the Dandianians during the war.

In 1927 he went to Australia, where he was sentenced to jail for thefts in Melbourne, Sydney and Brisbane. He was also sentenced to six months' imprisonment in Manchester in 1931 for stealing \$10,000 worth of jewelry.

Post will be aided by a robot which he has been testing for several weeks.

Post expects the robot to relieve him of the task of flying, leaving him free to navigate and rest.

Under plans announced, the route

would be much the same as that followed by Post and Gatty. Post would leave from New York with the intention of making a 4,300-mile jump over Russia, which probably would be broken at 2,600 miles for re-fueling. From Russia he plans to fly 2,200 miles over water and ice to Canada, and then 1,450 miles to Alaska and 2,100 miles back to New York.

The rebuilt plane will have a cruising speed of about 170 miles an hour and top speed of 225 miles an hour.

Geneva, Switzerland.—The wheat conference held here during the past week, attended by delegates from Canada, Australia, United States and the Argentine, has adjourned.

It was believed representatives of the four great wheat exporting countries agreed to the principle of a 10 per cent reduction in production and regulation of exports. The official communiqué issued, however,

merely states the committee hopes to frame definite proposals after its second meeting in London a few days before the world economic conference opens.

The communiqué goes on: "As the wheat crisis grows worse, it is being realized more and more clearly that it can only be combated by international understanding."

Referring to measures taken by

the government of the United States, the communiqué states: "The Canadian government has not yet accepted the recommendations of the International Conference of the League of Nations, which increased trade in wheat by five million tons.

Sir Austin Anne in a tense atmosphere and to the accompaniment of

approving cheers appealed to Mander to withdraw the measure, telling him that such steps should be taken only in the interest of all countries. At 11:30 A.M. the government's spokesman decided when a

majority of the house of commons

had increased 40,000 in the past year he said.

Mander withdrew the bill.

MENTIONED FOR BOARD

Penny Saving

Economy In Civil Service Could Save Millions

Ottawa, Ont.—The importance of guarding petty expenditures in the civil service was stressed by Watson MacKenzie, minister of the treasury finance department, in the course of an address before the civil service branch of the Canadian Legion here.

"If each of 20,000 civil servants were to undertake to perform his or her duties every day in such a way that he could save one cent per day, the sum reduced five cents a working hour, the saving would take care of over \$40,000,000 of debt," he said.

GERMANY READY TO CO-OPERATE IN PEACE PLAN

Berlin, Germany—Chancellor Hitler trumpeted Germany's demand for equality in armaments and announced Germany's address to co-operate with other nations in guaranteeing international security and tranquility in a pronouncement before the Reichstag.

Mr. Bracken, following a conference between the provincial government and representatives of Manitoba's industrial workers, who declared unused employment was growing in numbers and that increased aid from Ottawa is essential, declared he would wire the premiers of Alberta and Saskatchewan, suggesting the three provinces make joint representations to the Dominion government.

Reviewing relief work since 1930, Premier Bracken said 90,000 people now are on relief in Manitoba. More than 60,000 of these were in Winnipeg and St. Boniface, the province's two largest cities. Number on relief had increased 40,000 in the past year he said.

He said he considered Prime Minister Ramsay MacDonald's plan a starting point for solution of the arm's problem.

Hitler, in a speech of peaceful intent, said his generation had suffered too much from the insanity of war "to visit the same upon others."

Chancellor Hitler gratefully endorsed President Roosevelt's plan for resolving the international crisis and promised to co-operate with the Dominion. The debts of other corporations amounted to \$178,000,000.

For railway debts amounted to \$919,000,000, under which, while as far as the Canadian National Railway is concerned, embraces only that portion of its obligations not guaranteed by the Dominion. The debts of other corporations amounted to \$1,216,000,000.

With regard to private debt, the committee reported the figures available only partially covered the field.

However, the census of 1931 ascertained that out of a total of 654,297 persons engaged in agriculture in the Dominion, 241,000 were on farms in the Canadian prairies, while those engaged in agriculture in the Maritime provinces numbered 87,673,610.

The figures apply only to "owned farms" and to mortgages held by corporate companies.

LOAD OF DEBT BEARS HEAVILY ON DOMINION

Ottawa, Ont.—The public debt of Canadian nine provinces, municipalities and corporations amounts to \$85,509,600, the parliamentary banking committee reported to the House of Commons.

This load of debt represents an annual interest charge of \$421,965,600 at an average rate of 4.47 per cent.

Containing a number of recommendations, chief of which is one that urges a general conversion of Canada's outstanding obligations at lower interest rates, the report also details the debts of the country and of the provinces and municipalities.

Canada's net debt (Dominion) was placed at \$2,599,080,000 with the annual interest \$121,637,300.

The gross amount of direct liabilities of Canadian governments totals \$15,884,000,000, on which annual interest payments were \$77,610,000, the report stated.

As at March 31, 1933 bonds guaranteed by the Dominion of Canada for both principal and interest amounted to \$780,168,354, while those guaranteed for interest only totaled \$216,000,000.

Railway debts amounted to \$919,000,000, under which, while as far as the Canadian National Railway is concerned, embraces only that portion of its obligations not guaranteed by the Dominion. The debts of other corporations amounted to \$178,000,000.

With regard to private debt, the committee reported the figures available only partially covered the field.

However, the census of 1931 ascertained that out of a total of 654,297 persons engaged in agriculture in the Dominion, 241,000 were on farms in the Canadian prairies, while those engaged in agriculture in the Maritime provinces numbered 87,673,610.

The figures apply only to "owned farms" and to mortgages held by corporate companies.

New Labor Minister For British Columbia

W. M. Dennis Takes Office In Premier Tolmie's Cabinet

Victoria, B.C.—William Middleton Dennis, of Vancouver, president of the National Labor Council of the All-Canadian Congress of Labor, has been appointed to the cabinet as Minister of Labor in the Government of Premier of S. F. Tolmie.

Appointment of Mr. Dennis to the British Columbia cabinet is the first step taken by Premier Tolmie in the reorganization of the executive council.

The new minister has been a resident of Vancouver for 25 years, and is well known as British Columbia labor circles as a member of the Carpenters and Joiners. In 1915 he enlisted in the Canadian Engineers and served overseas throughout the duration of the war. Upon his return to Vancouver, Mr. Dennis was appointed instructor for some 200 young men in the engineering school.

Germany, the chancellor said, is ready to join any non-aggression pact in the realization that the high-minded proposal of the American president to inject the might of United States into the League of Nations in Europe would mean great tranquillity for all who would desire peace."

His government, he pledged, would proceed on no other path than that prescribed in the international treatise, but he asserted Germany would under no circumstances sign any pact which continued his disqualification.

Should such effort nevertheless be made, he warned that Germany would withdraw from international conference and from the League of Nations.

No new European war would be started, he declared, but the contrast, even if force succeeded, the result would only bring a greater disturbance of balance, and the germ would be laid for more trouble, misery and distress.

Such a conflict, he predicted, in the complete collapse of the social order as it is known today. He declared that a European sunk in Communism chaos would mean a crisis of tremendous extent and duration.

Business Is Improving

Change According To Reports Most Noticeable In West

Portland, Ore.—Business conditions and usage have been gradually on the upgrade throughout Canada in the last month if expansions reported in the Canadian Press b' le d' flm reflect conditions.

The most general pick-up is noted in the west, where a moderate expansion of staff has resulted mainly from activity in the food supply and wearing apparel industries.

Marina Russian Prince

Toronto, Ont.—A Canadian woman, daughter of a Russian prince, Robert Butchart, of Victoria, B.C., was quietly married to a prince of old Russia in the private chapel at the residence here of Her Grace Smith. The bride was Mrs. Harry Ross, daughter of Mr. and Mrs. Harry Ross, of Victoria.

The groom, Prince Andre Chirikov Chibinatoff, son of Princess Olga Chibinatoff, of Paris, France, they met in Paris.

REHEARSING FOR THE ROYAL TOURNAMENT
Here we see members of the Royal Navy and Royal Marines rehearsing the field gun display at Whale Island in preparation for the Royal Tournament to be held at Olympia, London. Our picture shows four of the team swinging the gun trail across an imaginary thirty-foot chasm.

The Charm Corset will be on display at Mr. Campbell's store on Saturday, May 27. Ladies of Champion and vicinity are all invited to look them over.

Mrs. Therriault will be there to answer anything you would like to know about them.

Wanted

To buy for cash a limited amount of Alberta Pool Commercial and Elevator Reserve deductions and discount. Apply Box 500 Brant giving amount of deductions.

Local and General

Owing to the fact that Champion will not sponsor a baseball team this year due to lack of material, P. Bouyan and J. McIntyre have signed up with Vulcan and M. F. Hamilton has signed with Strathmore.

May 24th was decidedly favorable for celebrations, the day being calm and beautiful. Blackie was the scene of entertainment for this section of the country and several from town witnessed the ball games.

Mrs. Boner was the guest of honor at a dinner held at her home on Monday, the occasion being her birthday. Those present were: Mrs. F. Clever, Mrs. McIntyre, Mrs. Heal, Mrs. Bouyan, Mrs. Chamberlin, Mrs. Latte and Mrs. H. Smith.

This issue completes the fourteenth year of the Chronicle's existence in Champion. Never during its existence have prices looked better for a prosperous year, and with everything in this mood, the Chronicle celebrates its fourteenth anniversary.
